Moodle Demonstration Site

Welcome!

This site is for you to try out a plain Moodle 2.3.2 site.

If you'd like to explore a Moodle site containing courses and activities, please visit the [Mount Orange School site](#) and if you'd like to test new features in the upcoming version of Moodle, please visit the [Moodle QA testing site](#).

Here are some demo accounts for you to use:

- Administrator - username *admin*, password *demo*
- Manager - username *manager*, password *demo*
- Teacher - username *teacher*, password *demo*
- Student - username *student*, password *demo*

The database and files are erased and restored to a clean state every hour on the hour, so don't worry if you make a mess.

Also please note that you might not be the only person using one of the demo accounts at the same time, so you may see unexpected things happen occasionally.

The screenshot shows the Moodle Tracker website. At the top, there's a navigation bar with links: About, News, Support, Community, Development, Downloads, My courses, Dashboards, Projects, Issues, and Agile. A 'Log In' link and a 'Quick Search' box are also present.

The main content area is divided into two columns. The left column, titled 'Introduction', contains a 'Welcome to the Moodle Tracker!' message, explaining that it's a place to report problems and new ideas. It includes a 'Login' section with instructions on how to create an account and login, and a 'Reporting an issue' section with instructions on how to search for existing issues, vote, or add a comment. It also provides links to 'Report a bug in Moodle' and 'Suggest an improvement'.

The right column, titled 'Login', contains a login form with fields for 'Username' and 'Password', a 'Remember my login on this computer' checkbox, and a 'Log In' button. Below the login form, there's a 'Projects' section listing several projects: Moodle (MDL), Moodle Community Sites (MDLSITE), and Moodle for Mobiles (MOBILE), each with a 'Lead' person listed.

It's not just for developers! :-)

All users should use this system to report problems or new ideas for Moodle and help us make it better.

quick search!
