# File handling up to M1.9

- The known way: course files

| Name                                                               | Size    | Modified                   | Action                                      |
|--------------------------------------------------------------------|---------|----------------------------|---------------------------------------------|
| <input type="checkbox"/> Systems                                   | 187.7MB | 17 February 2008, 05:35 PM | <a href="#">Rename</a>                      |
| <input type="checkbox"/> backupdata                                | 120KB   | 18 December 2009, 11:40 AM | <a href="#">Rename</a>                      |
| <input type="checkbox"/> db_preset                                 | 12KB    | 6 October 2008, 09:41 AM   | <a href="#">Rename</a>                      |
| <input type="checkbox"/> images                                    | 504KB   | 3 December 2007, 02:51 PM  | <a href="#">Rename</a>                      |
| <input type="checkbox"/> imgdb                                     | 12KB    | 26 April 2007, 05:40 PM    | <a href="#">Rename</a>                      |

With chosen files...

# File handling up to M1.9

- Issues

- Backups containing unused files
- Limited access control
- Reuse and sharing
- Access to external repositories
- ....

# File handling in Moodle 2.0

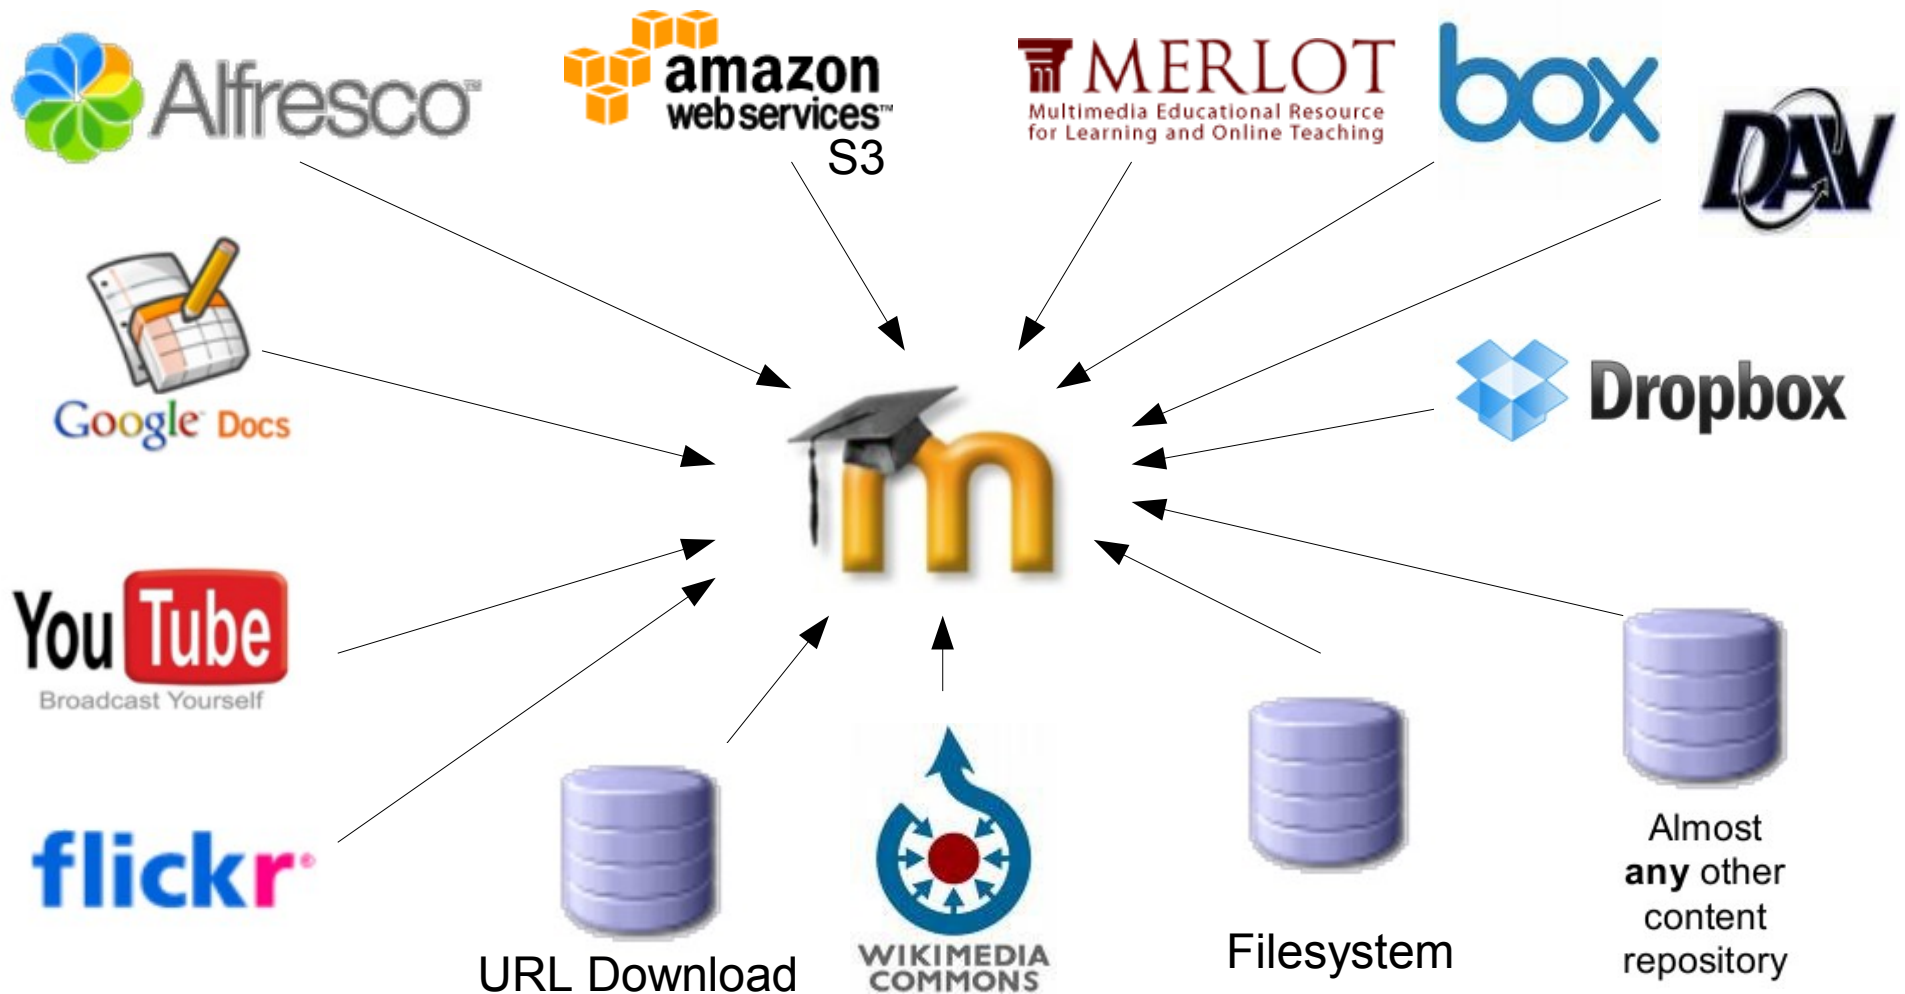

# File handling in Moodle 2.0

- A completely new paradigm
  - No more “course files”
  - Files connected to content they belong
    - Same ACL of content
    - Efficient backups
  - Files are not duplicated, same file can be used in different places
  - Repository API and plugins

# Repository

- Repository integration

# Personal File
